Have you evaluated the benefits of Snowflake?
(If not, you should)

snowflake

What is Snowflake?

Snowflake is a cloud-based data warehousing company and cloud service provider.

The **Snowflake cloud data platform** offers scalability, performance, affordability and integration capabilities that appeal to a broad range of different companies and organizations.

Founded in 2012, and publicly launched in 2014, Snowflake is coming off of an incredibly successful IPO with a market cap of **over $70 Billion**.

What Does Snowflake Offer?

Core workloads powered by Snowflake include:

- Data Engineering
- Data Warehousing
- Data Applications
- Data Lakes
- Data Science
- Data Exchange

Benefits of Snowflake

Top Snowflake benefits include:

Cost Savings

With cloud data solutions like Snowflake, you only pay for what you use, with no hidden costs.

Scalability

You can increase or decrease your resources on demand, which helps you to scale your business.

Reduced Time to Market

Having the secure, cost-efficient resources you need accelerates the pace of business and reduces time to market.

What Are Snowflake Service Partners?

Snowflake service partners help you **maximize your savings**, while increasing scalability and performance with a Snowflake migration.

Snowflake Service Partner Benefits

Snowflake Service Partners assist with:

- Establishing and configuring a Snowflake cloud data platform as a stand-alone project;

- Implementing a Snowflake cloud data platform in conjunction with another project, such as a custom software platform, mobile app, data lake or other data governance solution.

As a certified Snowflake partner, 7T has the business analysts, data scientists and developers required to implement Snowflake's many functionalities and solve your company's data needs quickly and efficiently.

If your company is ready to move toward improved data warehousing, effective data management and secure data transfer services, **speak with 7T** today about deploying Snowflake.
